

## **REMIT: Registration of market participants trading on LNG products pursuant to the REMIT Regulation**

April, 21-04- 2026

### **Registration of market participants trading on LNG products pursuant to REMIT Regulation**

This communication updates and amends the indications to market participants executing transactions in LNG products with delivery in the EU, as per the previous [communication](#) dated 2 January 2023.

As well known, Article 7a of Regulation 1227/2011, as amended by Regulation 1106/2024, (hereinafter “REMIT”) provides that ACER (the Agency for the Cooperation of Energy Regulators) shall produce and publish a daily reference price for LNG (LNG price assessment, as defined by Article 2, point 26 of REMIT).

Article 7c of REMIT establishes that LNG market participants (as defined by Article 2, point 25 of REMIT) shall submit daily to ACER the data in relation to their transactions in LNG products (LNG market data, as defined by Article 2, point 24 of REMIT).<sup>1</sup>

ACER developed a dedicated platform (TERMINAL) to collect daily information on LNG market data, as already foreseen by the previous Regulation 2576/2022.

The use of TERMINAL is allowed upon the creation of a dedicated account with the following requisites:

1. Registration of the *LNG Market Participant* in the European REMIT Register (CEREMP)
2. Submission to the CEREMP of two email addresses (principal and back-up) related to authorized person for the transmission of LNG market data

Provided that ARERA operates a National REMIT Register, LNG market participants already registered in Italy and intending to execute transactions on LNG products subject to REMIT Article 7c - consequently willing to use the platform TERMINAL - are requested to previously submit to ARERA ([protocollo@pec.arera.it](mailto:protocollo@pec.arera.it) e [servizi\\_sistema@arera.it](mailto:servizi_sistema@arera.it)) the following information:

- a. Name of the *LNG Market Participant*
- b. ACER code identifying the LNG Market Participant
- c. Two email addresses, qualified as "principal" and "back-up", corresponding to the persons that will transmit the LNG market data towards TERMINAL

---

<sup>1</sup> Provisions related to “LNG market data” were established by Regulation 2576/2022 and subsequently integrated within the framework of REMIT with the amendment by Regulation 1106/2024.

*LNG market participants* that provided the requested information as indicated by the communication dated 2 January 2023 and already using TERMINAL are requested to submit to ARERA – to the same email addresses provided above in this communication – any changes in the information previously provided and referred to at points a), b) and c), before updating the same information on TERMINAL.

Furthermore, persons willing to register to the National REMIT Register and to execute transactions in LNG – not yet registered as per REMIT Article 9 – are requested to previously proceed with the REMIT registration and subsequently transmit the information described above at point a), b) and c) to the email addresses indicated above.

Upon receipt of the information, ARERA will proceed with the transmission to the CEREMP to allow the creation or modification of the related user account on TERMINAL.

For the avoidance of any doubt, LNG market participants registered to the National REMIT Register and already using TERMINAL - following the submission of the requested information indicated in the communication dated 2 January 2023 – are not requested to perform any transmission to ARERA, provided that no change occurred in the information previously provided.
